SECTION C: Findings of Facts and Conclusions of Law

1. NVP, Inc., a person pursuant to 9 VAC 25-210-50, was issued the Permit authorizing certain activities in surface waters for the Project.
2. The Project site is located on Spriggs Road (Rt. 643) approximately one mile north of its intersection with Dumfries Road (Rt. 234) in Prince William County, Virginia. The Permit was authorized on December 14, 2006, for the total impact of 0.234 acre of surface waters, consisting of the permanent impact of 0.04 acre palustrine forested (PFO) wetlands and 0.19 acre (1,172 linear feet) of intermittent stream channel, and the temporary impact of 0.004 acre (37 linear feet) of intermittent stream channel. Members of DEQ staff conducted an inspection of the Project site on March 13, 2008, and conducted a compliance review of the file on May 28, 2008.
3. A NOV was issued to NVP, Inc. by DEQ (NOV No. 2008-05-NRO-001) on June 2, 2008, citing alleged violations of the Permit including the following:
 - a. Temporary impacts to 20 linear feet of perennial stream, resulting from the installation of a sanitary sewer utility line in Powell's Creek, a discharge of a pollutant, and 31 linear feet of intermittent stream channel associated with the discharge of rip rap in the stream channel, also a pollutant.
 - b. Permanent impacts to 294 linear feet of intermittent stream channel associated with grading and fill and relocation of the stream channel on-

site for the use as drainage for the stormwater retention pond. A review of DEQ files revealed that a planned change request was not received, and that these impacts were not authorized.

- c. Heavy machinery was used to complete work within Powell's Creek.
4. Powell's Creek and the intermittent stream channel are surface waters of the Commonwealth.
5. Upon review of DEQ files, no request for approval of the use of heavy machinery in a stream channel was received. The impacts to Powell's Creek and the intermittent stream channel were not authorized by the Permit.
6. A meeting was held with NVP's consultant, Burgess & Niple, Inc., and DEQ on June 24, 2008 to discuss the NOV and compliance issues.
7. At the meeting on June 24, 2008, two separate preliminary stream channel relocation plans of the relocated stream channel were presented.
8. A proposed final relocation plan was submitted to DEQ for review on November 10, 2008 and Burgess & Niple, Inc., on behalf of NVP, has been in coordination with DEQ staff to finalize a sufficient relocation plan. A second proposed final relocation design was submitted by Burgess & Niple, Inc. on February 19, 2009 and was approved on June 26, 2009.
9. NVP, Inc. conducted unauthorized fill activity which caused the discharge of a pollutant to surface waters of the Commonwealth resulting in temporary impacts to 51 feet of surface waters, permanent impact to 294 feet of surface waters, and the use of heavy machinery in those same waters in violation of the Permit, Va. Code §62.1-44.15:20 and 9 VAC 25-210-50.
